

AMP Investment Trust

Global Property

Fund Update

for the quarter ended 30 September 2016

This fund update was first made publicly available on 31 October 2016

What is the purpose of this update?

This document tells you how the Global Property fund has performed and what fees were charged. The document will help you to compare the fund with other funds. AMP Wealth Management New Zealand Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

To provide investors with exposure to listed real estate investments opportunities globally in a diversified portfolio as well as exposure to listed property companies on the New Zealand and Australian stock exchanges.

Total value of the fund	\$3,799,871
The date the fund started	24 March 1998

What are the risks of investing?

Risk indicator for the Global Property fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <http://today.amp.co.nz/risk-profile-calculator>.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

In addition to the general investment risks reflected in the fund's risk indicator, you should be aware this fund is concentrated in a particular asset class and not diversified across multiple asset classes. At any given point, market conditions that cause one asset class to do well may cause another asset class to do badly. This could result in negative or lower than expected returns compared to a fund which is diversified across multiple asset classes.

How has the fund performed?

	Average over past 5 years	Past year
Annual return (after deductions for charges and tax)	13.38%	12.62%
Annual return (after deductions for charges but before tax)	14.37%	13.27%
Market index annual return (reflects no deduction for charges and tax)	16.79%	19.77%

The market index annual return is based on 50% S&P/NZX All Real Estate Index and 50% FTSE EPRA/NAREIT Hedged Index. Additional information about the market index is available on the offer register at www.companiesoffice.govt.nz/disclose.

Annual return graph

This shows the return after fund charges and tax for each of the last 10 years ending 31 March. The last bar shows the average annual return for the last 10 years, up to 30 September 2016.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Global Property fund are charged fund charges. In the year to 31 March 2016 these were:

	% of net asset value
Total fund charges	1.92%
Which are made up of -	
Total management and administration charges	1.92%
Including -	
Manager's basic fee	1.61%
Other management and administration charges	0.31%
Total performance-based fees	0.00%
Other charges	Dollar amount per investor or description of how charge is calculated
Member fee	\$0.00

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the 'fees and other charges' document on the entry relating to the offer of interests in the AMP Investment Trust maintained on the offer register (www.companiesoffice.govt.nz/disclose) for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Craig had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Craig received a return after fund charges were deducted of \$1,262.00 (that is 12.62% of his initial \$10,000). Craig also paid \$0.00 in other charges. This gives Craig a total return after tax of \$1,262.00 for the year.

What does the fund invest in?

Actual investment mix¹

This shows the types of assets that the fund invests in.

Target investment mix

This shows the mix of assets that the fund generally intends to invest in.

Further information

You can also obtain this information, the PDS for the AMP Investment Trust, and some additional information from the offer register at www.companiesoffice.govt.nz/disclose.

Notes

- 1 The top ten investments and actual investment mix have been calculated excluding cash and cash equivalents held for operational purposes.
- 2 These individuals are members of the AMP Financial Services Investment Committee. The other members are Grant David Hassell (Managing Director, AMP Capital New Zealand) and Jeffery Darren Ruscoe (Chief Customer Officer, AMP Financial Services). This Committee makes investment decisions in relation to the fund on behalf of the Manager. Members do not participate in any decisions where a conflict of interest arises.
