

New Zealand Retirement Trust

AMP Global Multi-Asset Fund

Fund Update

for the quarter ended 30 June 2017

This fund update was first made publicly available on 28 July 2017

What is the purpose of this update?

This document gives you information about the AMP Global Multi-Asset Fund, including its target investment mix and what fees are charged. The document will help you to compare the fund with other funds. AMP Wealth Management New Zealand Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The fund is a diversified fund that aims to generate a positive return above inflation and to actively respond to changing market conditions with a flexible approach to investing.

Total value of the fund	\$1,010,744
Number of investors in the fund	36
The date the fund started	28 July 2016

What are the risks of investing?

Risk indicator for the AMP Global Multi-Asset Fund¹:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at today.amp.co.nz/risk-profile-calculator.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

Specific risk

In addition to the general investment risks, you should be aware that the investment management style of this fund means that it may be concentrated in a particular asset class or type of investment vehicle, geographical area or industry at any point in time. This may subject the fund to significant performance volatility relative to its objectives. If this volatility occurs, the Global Multi-Asset Fund may fail to meet its stated performance objective.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	Not applicable
Annual return (after deductions for charges but before tax)	Not applicable
Market index annual return (reflects no deduction for charges and tax)	7.48%

The market index annual return is based on the New Zealand Consumer Price Index (CPI) plus 5.25% p.a. Additional information about the market index is available on the offer register at companiesoffice.govt.nz/disclose. Index disclaimers can be found on the AMP website at amp.co.nz/indexdisclaimers.

What fees are investors charged?

Investors in the AMP Global Multi-Asset Fund are charged fund charges². Our estimate of the fund charges as at 30 June 2017 are:

	% of net asset value
Total fund charges (estimated)³	1.44%
Which are made up of -	
Total management and administration charges (estimated)	1.44%
Including -	
Manager's basic fee (estimated) ⁴	1.23%
Other management and administration charges (estimated) ^{4,5}	0.21%
Total performance-based fees	0.00%
Other charges	Dollar amount per investor or description of how charge is calculated
Member fee ⁶	\$107.52

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the 'fees and other charges' document on the entry relating to the offer of interests in the New Zealand Retirement Trust maintained on the offer register (companiesoffice.govt.nz/disclose) for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Craig had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Craig received a return after fund charges were deducted of \$748.00 (that is 7.48% of his initial \$10,000). Craig also paid \$107.52 in other charges. This gives Craig a total return after tax of \$640.48 for the year.⁷

What does the fund invest in?

Actual investment mix⁸

This shows the types of assets that the fund invests in.

*Other consists of alternative assets (12.17%)

Further information

You can also obtain this information, the PDSs for the New Zealand Retirement Trust, and some additional information from the offer register at companiesoffice.govt.nz/disclose. The information in this fund update forms part of each PDS for the New Zealand Retirement Trust.

Notes

- 1 As the fund started on the date above, actual returns for the last five years are not available. To calculate the risk indicator we have used forecast volatility of the underlying fund. We consider this is the most reasonable method available. As a result of this method being used, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
- 2 The management and administration charges are made up of the Manager's basic fee (comprising the investment management fee and administration fee) and the other management and administration charges (service fee and costs and expenses). The amounts stated in this fund update are the actual amounts charged to the fund (or estimated to be charged to the fund – see estimate notes below). However, the fees payable by any member will depend on the section of the Scheme they are a member of (including whether they are a member of the Scheme through an employer plan), and whether any reduction of the fee amounts has been agreed. Please see the 'fees and other charges' document on the entry relating to the offer of interests in the New Zealand Retirement Trust maintained on the offer register (companiesoffice.govt.nz/disclose), with your Member Booklet (if you are a member of an employer plan), to work out your fees.
- 3 As the fund started on the date above, historic information for the most recent scheme year is not available. The total fund charges shown include our best estimates of the amount of costs and expenses that will be charged to the fund. These have been estimated as a percentage of the fund's net asset value and include both expenses expected to be incurred by the fund and fees (and costs) expected to be charged by the managers of the underlying funds in which the fund invests. These fees have been determined using estimates provided by the underlying fund managers and our experience with the Scheme.
- 4 The total fund charges include administration fees and services fees that while calculated by reference to investment balances are not allocated to specific funds. As the actual amount of the fee charged to the fund cannot be reported, estimates have been used. The estimate for the administration fee is 0.33% and the estimate for the services fee is 0.04%. The estimates represent the percentage of the fees deducted from the Scheme for the year over the average funds under management for the Scheme for the year.
- 5 The other management and administration charges include estimates of underlying fund charges provided by underlying fund managers. The balance dates of the underlying fund(s) do not align with the balance date of the fund. To estimate the charges, AMP includes the underlying fund charges as at the relevant underlying fund(s) balance date, adjusted (where required) to reflect any material changes advised to AMP by the relevant underlying manager as having occurred during the intervening period.
- 6 If you are a member through an employer plan, you may receive the benefit of reduced member fees – please see your Member Booklet for details of any discounts. Members of the NZRT Personal Superannuation Section are not currently charged member fees. Therefore the impact of these fees on you could be less than that set out in the example.
- 7 As the fund started on the date above, this calculation is based on the market index return for the past year and treats all investment returns as taxable.
- 8 The top ten investments and actual investment mix have been calculated excluding cash and cash equivalents held for operational purposes.
- 9 The Global Multi-Asset Fund's target investment mix of 95% "Other" represents the fact that it doesn't have a target asset allocation but operates within broad ranges across asset types.
