The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [today.amp.co.nz/risk-profile-calculator](http://today.amp.co.nz/risk-profile-calculator).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

## Notes

- 1 We have used a composite index to prepare the table and bar graph, as there was no market index available for some of the relevant assets. The composite index is calculated using the target investment mix weightings of the underlying market and peer group indices for the asset classes that the fund invests into. A composite index may be a less reliable indicator of performance than an appropriate market index. The return for the peer group index reflected in the table and the bar graph is net of fund charges and trading expenses, and gross of tax. Additional information about the market and peer group indices is available in the Statement of Investment Policy and Objectives for your product which is available on the offer register at [disclose-register.companiesoffice.govt.nz](http://disclose-register.companiesoffice.govt.nz). Index disclaimers can be found on the AMP website at [amp.co.nz/indexdisclaimers](http://amp.co.nz/indexdisclaimers).
- 2 Some components of the composite index for this fund have changed in the past quarter to more closely align with our underlying investments. For details of the indices used to calculate the composite index, please see the Statement of Investment Policy and Objectives for your product which is available on the offer register at [disclose-register.companiesoffice.govt.nz](http://disclose-register.companiesoffice.govt.nz).
- 3 The returns include an estimated administration and service fee, which has been determined by using the average fee charged for the entire NZRT. Individual returns will depend on the administration and service fee applicable to the individual member. For more information relating to the administration and service fee applicable to you, please see the applicable PDS or the Member Booklet for your employer plan.
- 4 The management and administration charges are made up of the Manager's basic fee (comprising the investment management fee and administration fee) and the other management and administration charges (service fee and costs and expenses). The amounts stated in this fund update are the actual amounts charged to the fund (or estimated to be charged to the fund – see estimate notes below). However, the fees payable by any member will depend on the section of the Scheme they are a member of (including whether they are a member of the Scheme through an employer plan), and whether any reduction of the fee amounts has been agreed. Please see the 'fees and other charges' document on the entry relating to the offer of interests in the New Zealand Retirement Trust maintained on the offer register ([disclose-register.companiesoffice.govt.nz](http://disclose-register.companiesoffice.govt.nz)), with your Member Booklet (if you are a member of an employer plan), to work out your fees.
- 5 The Total Fund Charges are inclusive of any applicable GST.
- 6 The total fund charges include administration fees and service fees that while calculated by reference to investment balances are not allocated to specific funds. As the actual amount of the fees charged to the fund cannot be reported, estimates have been used. The estimate for the administration fee is 0.31% and the estimate for the service fee is 0.04%. The estimates represent the percentage of the fees deducted from the Scheme for the year over the average funds under management for the Scheme for the year.
- 7 The other management and administration charges include estimates of underlying fund charges provided by underlying fund managers. The balance dates of the underlying fund(s) do not align with the balance date of the fund. To estimate the charges, AMP includes the underlying fund charges as at the relevant underlying fund(s) balance date, adjusted (where required) to reflect any material changes advised to AMP by the relevant underlying manager as having occurred during the intervening period.
- 8 You may receive the benefit of reduced member fees. For details of any discounts, please speak with your adviser or see your Member Booklet (if you are a member through an employer plan). Members of the NZRT Personal Superannuation Section are not currently charged member fees. Therefore the impact of these fees on you could be less than that set out in the example.
- 9 The actual investment mix and top ten investments have been calculated excluding cash and cash equivalents held for operational purposes.
