What are the risks of investing?

Risk indicator for the Global Shares fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at today.amp.co.nz/risk-profile-calculator.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

Specific risk

In addition to the general investment risks, you should be aware this fund is concentrated in a particular asset class and not diversified across multiple asset classes. At any given point, market conditions that cause one asset class to perform well may cause another asset class to perform poorly. This could result in negative or lower than expected returns compared to a fund which is diversified across multiple asset classes.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Craig had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Craig received a return after fund charges were deducted of \$1,891.00 (that is 18.91% of his initial \$10,000). Craig also paid \$0.00 in other charges. Notes

- 1 The returns include any rebates of management fees which have been paid to qualifying investors. No allowance has been made for any loyalty bonus which certain investors may be entitled to.
- 2 The returns shown for 2016 have been impacted as a result of a tax liability associated with the provision of the loyalty bonus (a feature of the scheme). This has resulted in a downward adjustment in unit prices and will affect the comparability of the 2016 returns against other years.
- 3 The total fund charges exclude loyalty bonuses which have been paid to certain members and the cost of future tax obligations on loyalty bonuses.
- 4 The other management and administration charges include estimates of underlying fund charges provided by underlying fund managers. The balance dates of the underlying fund(s) do not align with the balance date of the fund. To estimate the charges, AMP includes the underlying fund charges as at the relevant underlying fund(s) balance date, adjusted (where required) to reflect any material changes advised to AMP by the relevant underlying manager as having occurred during the intervening period.
- 5 The actual investment mix and top ten investments have been calculated excluding cash and cash equivalents held for operational purposes.
- 6 Simon John Hoole has not been named as a key person in the previous fund update for the fund as he was appointed on 2 February 2017.
