

AMP Personal Superannuation Scheme

Select Conservative

Fund Update

for the year ended 31 March 2017

This fund update was first made publicly available on 30 June 2017

What is the purpose of this update?

This document tells you how the Select Conservative fund has performed and what fees were charged. The document will help you to compare the fund with other funds. AMP Wealth Management New Zealand Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The fund aims to provide a well-diversified portfolio that primarily invests in lower-risk income assets with a conservative allocation to growth assets.

| | |
|---------------------------------|---------------|
| Total value of the fund | \$9,836,030 |
| Number of investors in the fund | 299 |
| The date the fund started | 9 August 2004 |

What are the risks of investing?

Risk indicator for the Select Conservative fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at today.amp.co.nz/risk-profile-calculator.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

How has the fund performed?

| | Average over past 5 years | Past year |
|--|---------------------------|-----------|
| Annual return (after deductions for charges and tax) | 3.62% | 2.97% |
| Annual return (after deductions for charges but before tax) | 4.43% | 3.48% |
| Market index annual return (reflects no deduction for charges and tax) | 5.86% | 4.77% |

The market index annual return is based on a composite index, calculated using the target investment mix weightings of the underlying market indices that the fund invests into. Additional information about the market index is available on the offer register at companiesoffice.govt.nz/disclose. Index disclaimers can be found on the AMP website at amp.co.nz/indexdisclaimers.

Annual return graph

This shows the return after fund charges and tax for each of the last 10 years ending 31 March. The last bar shows the average annual return for the last 10 years, up to 31 March 2017.

Important: This does not tell you how the fund will perform in the future.

What fees are investors charged?

Investors in the Select Conservative fund are charged fund charges. In the year to 31 March 2017 these were:

| | % net asset value |
|--|--|
| Total fund charges | 1.90% |
| Which are made up of - | |
| Total management and administration charges | 1.90% |
| Including - | |
| Manager's basic fee | 1.55% |
| Other management and administration charges | 0.35% |
| Total performance-based fees | 0.00% |
| Other charges | Dollar amount per investor or description of how charge is calculated |
| NIL | |

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). Small differences in fees and charges can have a big impact on your investment over the long term.

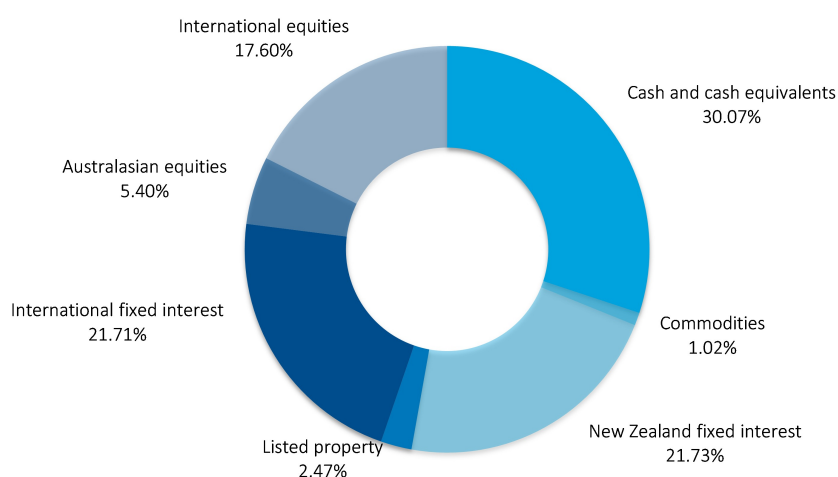

Example of how this applies to an investor

Craig had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Craig received a return after fund charges were deducted of \$297.00 (that is 2.97% of his initial \$10,000). Craig also paid \$0.00 in other charges. This gives Craig a total return after tax of \$297.00 for the year.

What does the fund invest in?

Actual investment mix¹

This shows the types of assets that the fund invests in.

Target investment mix

This shows the mix of assets that the fund generally intends to invest in.
