What are the risks of investing?

Risk indicator for the Global Select Balanced Growth Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at **sorted.org.nz/tools/investor-profiler**.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

Other factors impact investors' returns that are not reflected in the risk indicators. These include investment strategy and selection of underlying fund managers. There will be times when market conditions result in a particular style doing better or worse than others. Investors' returns will move up and down accordingly. To reduce this risk AMP has a monitoring process in place to ensure our service provider(s) are compliant with contractual arrangements and our investment strategy guidelines. Details of other specific risks, and other general risks, can be found in the Other Material Information (OMI) on the Scheme's offer register entry at disclose-register.companiesoffice.govt.nz.
