### What are the risks of investing?

Risk indicator for the ASB Moderate Fund<sup>2</sup>:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <http://today.amp.co.nz/risk-profile-calculator>.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

## Notes

- 1 As at 28 July 2016, this fund may be selected as an investment option by members of the Scheme. However, it was not available prior to that date.
- 2 As the fund started on the date noted above, actual returns for the fund are not available. Market index returns for the 5 years to 30 June 2016, rather than the fund's actual returns, have been used to fill in the risk indicator. As a result of those market returns being used, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
- 3 As the fund started on the date noted above, historical fee information is not available. The total fund charges shown include our best estimates of the amount of costs and expenses that will be charged to the fund. These have been estimated as a percentage of the fund's net asset value and include both expenses expected to be incurred by the fund and fees (and costs) expected to be charged by the managers of the underlying funds in which the fund invests. These include fees for audit, printing and distribution, regulatory compliance, IT costs, administration manager charges, performance fees charged by unrelated underlying funds and other professional service fees. These fees have been determined using estimates provided by the underlying fund managers, our experience with the Scheme and an assumption that total fund charges will increase over the Scheme's next accounting period to 31 March 2017 as a result of increased regulatory costs and administration manager charges.
- 4 Note that the amount of the member fee could be less if you are in an employer plan and the impact of these fees on you could be less than that set out in the example – check your Member Booklet for details.
- 5 As the fund started on the date noted above, this calculation is based on the market index return for the period (see note 2).
- 6 These individuals are members of the AMP Financial Services Investment Committee. The other members are Grant Hassell (Managing Director, AMP Capital New Zealand), Jeffery Darren Ruscoe (Chief Customer Officer, AMP Financial Services) and Christopher James White (Managing Director, Spicers). This Committee makes investment decisions in relation to the fund on behalf of the Manager. Members do not participate in any decisions where a conflict of interest arises. Sean Henaghan and Grant Hassell are not directors or employees of the Manager.
