

AMP KiwiSaver Scheme

AMP Global Multi-Asset Fund

Fund Update

for the quarter ended 31 December 2016

This fund update was first made publicly available on 13 February 2017

What is the purpose of this update?

This document gives you information about the AMP Global Multi-Asset Fund, including its target investment mix and what fees are charged. The document will help you to compare the fund with other funds. AMP Wealth Management New Zealand Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

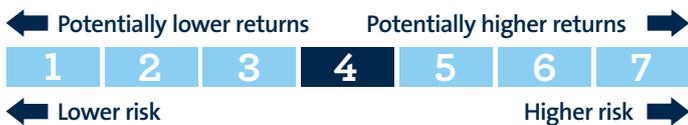

Description of this fund

The fund is a diversified fund that aims to generate a positive return above inflation and to actively respond to changing market conditions with a flexible approach to investing.

Total value of the fund	\$1,379,106
Number of investors in the fund	60
The date the fund started	28 July 2016

What are the risks of investing?

Risk indicator for the AMP Global Multi-Asset Fund¹:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <http://today.amp.co.nz/risk-profile-calculator>.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

Specific risk

In addition to the general investment risks reflected in the fund's risk indicator, you should be aware that the investment management style of this fund means that it may be concentrated in a particular asset class or type of investment vehicle, geographical area or industry at any point in time. This may subject the fund to significant performance volatility relative to its objectives. If this volatility occurs, the Global Multi-Asset Fund may fail to meet its stated performance objective.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	Not applicable
Annual return (after deductions for charges but before tax)	Not applicable
Market index annual return (reflects no deduction for charges and tax)	6.73%

The market index annual return is based on the New Zealand Consumer Price Index (CPI) plus 5.25% p.a. Additional information about the market index is available on the offer register at www.companiesoffice.govt.nz/disclose.

What fees are investors charged?

Investors in the AMP Global Multi-Asset Fund are charged fund charges. Our estimate of the fund charges as at 31 December 2016 are:

	% of net asset value
Total fund charges (estimated)²	1.58%
Which are made up of -	
Total management and administration charges (estimated)²	1.58%
Including -	
Manager's basic fee	1.43%
Other management and administration charges	0.15%
Total performance-based fees	0.00%
Other charges	Dollar amount per investor or description of how charge is calculated
Member fee ³	\$23.40

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the 'fees and other charges' document on the entry relating to the offer of interests in the AMP KiwiSaver Scheme maintained on the offer register (www.companiesoffice.govt.nz/disclose) for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Craig had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Craig received a return after fund charges were deducted of \$673.00 (that is 6.73% of his initial \$10,000). Craig also paid \$23.40 in other charges. This gives Craig a total return after tax of \$649.60 for the year.⁴

What does the fund invest in?

Actual investment mix⁵

This shows the types of assets that the fund invests in.

*Other consists of alternative assets (13.67%)

Further information

You can also obtain this information, the PDS for the AMP KiwiSaver Scheme, and some additional information from the offer register at www.companiesoffice.govt.nz/disclose.

Notes

- 1 Forecast volatility of the underlying fund into which the fund invests has been used to calculate the risk indicator as we consider this is the most reasonable methodology available. As a result of this method being used the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
- 2 As the fund started on 28 July 2016, historical fee information for the most recent scheme year is not available. The total fund charges shown include our best estimates of the amount of costs and expenses that will be charged to the fund. These have been estimated as a percentage of the fund's net asset value and include both expenses expected to be incurred by the fund and fees (and costs) expected to be charged by the managers of the underlying funds in which the fund invests. These include fees for audit, printing and distribution, regulatory compliance, IT costs, administration manager charges, performance fees charged by unrelated underlying funds and other professional service fees. These fees have been determined using estimates provided by the underlying fund managers, our experience with the Scheme and a presumption that total fund charges will increase over the Scheme's next accounting period to 31 March 2017 as a result of increased regulatory costs and administration manager charges.
- 3 Note that the amount of the member fee could be less for some members - check with your adviser to see whether a discount applies to you.
- 4 As the fund started on 28 July 2016, this calculation is based on the market index return for the past year and treats all investment returns as taxable.
- 5 The top ten investments and actual investment mix have been calculated excluding cash and cash equivalents held for operational purposes.
- 6 The Global Multi-Asset Fund's target investment mix of 95% "Other" represents the fact that it doesn't have a target asset allocation but operates within broad ranges across asset types.
- 7 These individuals are members of the AMP Financial Services Investment Committee. The other members are Grant David Hassell (Managing Director, AMP Capital New Zealand) and Jeffery Darren Ruscoe (Chief Customer Officer, AMP Financial Services). This Committee makes investment decisions in relation to the fund on behalf of the Manager. Members do not participate in any decisions where a conflict of interest arises.
