

AMP KiwiSaver Scheme
AMP Global Multi-Asset Fund

Fund Update

for the quarter ended 30 June 2016

This fund update was first made publicly available on 28 July 2016¹

What is the purpose of this update?

This document gives you information about the AMP Global Multi-Asset Fund, including its target investment mix and what fees are charged. The document will help you to compare the fund with other funds. AMP Wealth Management New Zealand Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The fund is a diversified fund that aims to generate a positive return above inflation and to actively respond to changing market conditions with a flexible approach to investing.

Total value of the fund	-
Number of members in the fund	-
The date the fund started	28 July 2016

What are the risks of investing?

Risk indicator for the AMP Global Multi-Asset Fund²:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <http://today.amp.co.nz/risk-profile-calculator>.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

In addition to the general investment risks reflected in the fund's risk indicator, you should be aware that the investment management style of this fund means that it may be concentrated in a particular asset class or type of investment vehicle, geographical area or industry at any point in time. This may subject the fund to significant performance volatility relative to its objective. If this volatility occurs, the Global Multi-Asset Fund may fail to meet its stated performance objective.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	Not applicable
Annual return (after deductions for charges but before tax)	Not applicable
Market index annual return (reflects no deduction for charges and tax)	6.74%

The market index annual return is based on the New Zealand Consumer Price Index (CPI) plus 5.25% p.a. Additional information about the market index is available on the offer register at <http://www.business.govt.nz/disclose>.

What fees are investors charged?

Investors in the AMP Global Multi-Asset Fund are charged fund charges. Our estimate of the fund charges as at 30 June 2016 are:

	% of net asset value
Total fund charges (estimated) ³	1.65%
Which are made up of :	
Total management and administration charges (estimated) ³	1.65%
Including :	
Manager's basic fee	1.43%
Other management and administration charges	0.22%
Total performance based fees	0.00%

Other charges	Dollar amount per investor or description of how charge is calculated
Member fee ⁴	\$23.40

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the 'fees and other charges' document on the entry relating to the offer of interests in the AMP KiwiSaver Scheme maintained on the Disclose Register (<http://www.business.govt.nz/disclose>) for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Craig had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Craig received a return after fund charges were deducted of \$674.00 (that is 6.74%⁵ of his initial \$10,000). Craig also paid \$23.40 in other charges. This gives Craig a total return after tax of \$650.60 for the year.

What does the fund invest in?

Actual investment mix

As the fund started on the date noted above, information regarding the actual assets that the fund invests in as at 30 June 2016 is not available.

Further information

You can also obtain this information, the PDS for the AMP KiwiSaver Scheme, and some additional information from the offer register at <http://www.business.govt.nz/disclose>.

Notes

- 1 As at 28 July 2016, this fund may be selected as an investment option by members of the Scheme. However, it was not available prior to that date.
- 2 As the fund started on the date noted above, actual returns for the fund are not available. Forecast volatility of the underlying fund into which it invests has been used to calculate the risk indicator as we consider this is the most reasonable methodology available. As a result of this method being used the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
- 3 As the fund started on the date noted above, historical fee information is not available. The total fund charges shown include our best estimates of the amount of costs and expenses that will be charged to the fund. These have been estimated as a percentage of the fund's net asset value and include both expenses expected to be incurred by the fund and fees (and costs) expected to be charged by the managers of the underlying funds in which the fund invests. These include fees for audit, printing and distribution, regulatory compliance, IT costs, administration manager charges, performance fees charged by unrelated underlying funds and other professional service fees. These fees have been determined using estimates provided by the underlying fund managers, our experience with the Scheme and an assumption that total fund charges will increase over the Scheme's next accounting period to 31 March 2017 as a result of increased regulatory costs and administration manager charges.
- 4 Note that the amount of the member fee could be less if you are in an employer plan and the impact of these fees on you could be less than that set out in the example – check your Member Booklet for details.
- 5 As the fund started on the date noted above, this calculation is based on the market index return for the period.
- 6 These individuals are members of the AMP Financial Services Investment Committee. The other members are Grant Hassell (Managing Director, AMP Capital New Zealand), Jeffery Darren Ruscoe (Chief Customer Officer, AMP Financial Services) and Christopher James White (Managing Director, Spicers). This Committee makes investment decisions in relation to the fund on behalf of the Manager. Members do not participate in any decisions where a conflict of interest arises. Sean Henaghan and Grant Hassell are not directors or employees of the Manager.
