

AMP KiwiSaver Scheme

AMP Income Generator Fund

Fund Update

for the quarter ended 31 December 2017

This fund update was first made publicly available on 13 February 2018

What is the purpose of this update?

This document gives you information about the AMP Income Generator Fund, including its target investment mix and what fees are charged. The document will help you to compare the fund with other funds. AMP Wealth Management New Zealand Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The fund invests in an underlying fund that invests in a diversified mix of growth and defensive assets, with a focus on reliable income generation. The fund aims to provide a gross fixed monthly income in excess of bank deposit rates, along with a positive return on capital over the long term.

Total value of the fund	\$2,065,274
Number of investors in the fund	93
The date the fund started	28 July 2016

What are the risks of investing?

Risk indicator for the AMP Income Generator Fund¹:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at today.amp.co.nz/risk-profile-calculator.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	7.32%
Annual return (after deductions for charges but before tax)	8.63%
Market index annual return (reflects no deduction for charges and tax)	7.64%

The market index annual return is based on a composite index, calculated using the target investment mix weightings of the underlying market indices that the fund invests into. Additional information about the market index is available on the offer register at companiesoffice.govt.nz/disclose. Index disclaimers can be found on the AMP website at amp.co.nz/indexdisclaimers.

What fees are investors charged?

Investors in the AMP Income Generator Fund are charged fund charges. Our estimate of the fund charges as at 31 December 2017 are:

	% of net asset value
Total fund charges (estimated) ²	1.26%
Which are made up of -	
Total management and administration charges (estimated) ²	1.26%
Including -	
Manager's basic fee	0.98%
Other management and administration charges	0.28%
Total performance-based fees	0.00%
Other charges	Dollar amount per investor or description of how charge is calculated
Member fee	\$23.40

Different administration or member fees may apply to some members. Any different fees will be set out in the Member Booklet or supplement, if applicable, which you can request from your Adviser.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the 'fees and other charges' document on the entry relating to the offer of interests in the AMP KiwiSaver Scheme maintained on the offer register (companiesoffice.govt.nz/disclose) for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Craig had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Craig received a return after fund charges were deducted of \$732.00 (that is 7.32% of his initial \$10,000). Craig also paid \$23.40 in other charges. This gives Craig a total return after tax of \$708.60 for the year.

What does the fund invest in?

Actual investment mix³

This shows the types of assets that the fund invests in.

Further information

You can also obtain this information, the PDS for the AMP KiwiSaver Scheme, and some additional information from the offer register at companiesoffice.govt.nz/disclose. The information in this fund update forms part of the PDS for the AMP KiwiSaver Scheme.

Notes

- 1 As the fund started on the date above, actual returns for the last five years are not available. To calculate the risk indicator for the five year period up to the date of this fund update a combination of market index returns, underlying fund returns and actual returns have been used where relevant. We consider this to be the most accurate way to calculate returns and as a result of this calculation, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
- 2 As the fund started on the date above, historic information for the most recent scheme year is not available. The total fund charges shown include our best estimates of the amount of costs and expenses that will be charged to the fund based on forecasts from both the manager and underlying fund managers.
- 3 The actual investment mix and top ten investments have been calculated excluding cash and cash equivalents held for operational purposes.
