These returns should be read in conjunction with the notes below:

The returns stated represent in each case and for each fund, the percentage change in the unit price over the period.

The methodology used to calculate these returns assumes all income is reinvested into the fund. It is therefore a combined measure of both capital growth and income. Returns shown for periods of one year or more are annualised.

These are not necessarily the returns individual investors will receive as this will depend on the prices at which units are purchased and sold, the dates of these transactions and any additional contributions or withdrawals made during the period.

Past performance is not indicative of future performance and is not guaranteed by any party.

Returns are after the annual management fee and tax. No allowance has been made for any entry fees.

These returns assume that no rebate of the annual management fee has been applied. Rebates may currently apply for investments exceeding \$50,000.
